

## **COPYRIGHT POLICY**

Under the laws of most countries, copyright is the legal right that protects original works of authorship, such as books, music, film and art. In most countries, copyright does not protect facts, ideas, systems or methods of operation. Some of these may be protected by other rights. Generally, copyright does not protect facts and ideas, but it may protect the original words or images that express that idea. However, copyright does not protect all expressions. As explained by the U.S. Copyright Office, "copyright does not protect names, titles, slogans, or short phrases. In some cases, these things may be protected as trademarks."
